

All about EQQUAL.IO

Eqqual is a No.1 smart contract for starting and developing a blockchain-powered online business. Eqqual operates as a decentralized platform that connects people from all over the world and provides unlimited opportunities for a brand new economics since 2022.

□□ Why EQQUAL.IO is special?

- **100% Decentralized**

Eqqual has no management or owners. As soon as it is implemented as a smart contract, it starts operating autonomously. Since smart contracts are by their very nature irreversible, nobody can alter it, not even the founders and engineers.

The Eqqual smart contract controls user interactions in accordance with marketing plans. There is no CEO or owner who can change the rules and terms of Eqqual ecosystem. The founders are ordinary users who follow the same rules and mechanics as everyone else in the community.

- **Solid Foundation**

The foundations for long-term development, goal achievement, and the opening of new opportunities are the defining characteristics of Eqqual.

→No. 1 - A strong foundation for the growth of structures

□ In Eqqual, all mechanisms are implemented using smart contracts that uphold security, integrity, transparency, and inviolability. This business model has limitless scalability.

→No. 2 - Developing a strong team of partners

□ Eqqual gives everyone the opportunity to create, maintain and develop their own team, where you can join forces indefinitely in different areas within one network. You have nothing to worry about if you have been with Eqqual all this time!

- **Low Risk**

All transactions are executed peer-to-peer, from one personal wallet to another. The platform itself does not store any funds. There is no need to 'withdraw', since there's nothing to withdraw. The funds are already on the users' wallets. Eqqual has no access to the funds, and nothing can affect the crypto economics of the smart contract. Even if the website crashes or becomes blocked, it won't stop Eqqual from operating. The website is merely an interface that facilitates the interaction between users. All the transactions are made in the blockchain, and they can never be

compromised or canceled.

It makes Eqqual absolutely resistant to any interference from third parties, be it malefactors, authorities, or even the founders.

• No Fees

The platform does not charge any commissions or other additional costs to any participants. This was made possible by the stringent standards established when the platform was founded back in 2020.

There is no distinction between administrators, founders, and other participants in Eqqual ; everyone is treated equally. Furthermore, the blockchain allows for the implementation of cryptomarketing without the need for banks, payment processors, or other third parties.

As a result, the community does not charge internal fees that lower its revenue.

The founders of Eqqual are regarded as regular participants. Like everyone else, they have their own accounts and generate income by building affiliate networks.

• Transparent

Every transaction on the blockchain is accessible to anyone who wants to examine it. They are always visible in a block observer that utilities one of three blockchains.

Because of this, you can always keep track of the payments that you and other Eqqual users make.

The smart contract is also available for inspection, and you are always welcome to check its workings on your own or with the assistance of a reliable third party.

• The most up-to-date Technology

Eqqual suggests utilizing the most cutting-edge technologies currently accessible to guarantee people get the ideal possible experience while establishing their online businesses.

Since Eqqual does away with counter parties and other restrictions, it replaces all previous business models, both online and offline. By using the Public wallet key alone, Web3 technology enables connections between users without the need to reveal any sensitive information.

Users' names, phone numbers, IDs, or other private information are not required for permission in Eqqual. Users of Eqqual are not required to go through the KYC process and can stay entirely anonymous.

• Unstoppable

The entire premise of Eqqual is predicated on infinitely running separate programmers that are completely uncontrollable, not even by their designers.

Their logic is made immutable by the smart contract, meaning that once it is placed in the blockchain, it cannot be altered or destroyed. Eqqual is unstoppable due to the immutability of the smart contract combined with ethically sound programmers.

Nobody can intervene or change anything, not even the founders, hackers, or authorities. Eqqual will function as long as there is an Internet.

- ## User-friendly App

A personal dashboard provides interactive visualization of a user's structure in online mode.

Users can monitor the number of partners, the current state of [activated](#) slots, and all the other significant data in real time.

- ## No Special Equipment or Knowledge Required

All you need to use the platform is a computer, tablet, or smartphone. No specialized tools are needed. To establish your internet business with Eqqual, you are also not required to have any specialized training or prior expertise. As you create your Eqqual account, you can learn all you require while on the go.

Since Eqqual is a community that expands organically through the invitation of new partners, the person who invited you can guide you through each step and make sure you follow it exactly.
